

STEP 1

What to Gather

When you're getting ready to buy insurance, arming yourself with information about your home is the best way to find insurance that works for you.

Here are a few questions you can ask yourself:

What updates were done on the home and when?

When was the roof, furnace and hot water tank last replaced?

How old is the plumbing, electrical, sump pump and backwater valve?

How far are you from a fire hydrant/hall?

How old is the home?

What is the square footage of the home and any other buildings on the property?

Are there any special features to consider? For example, a pool or water feature.

While these are some of the basics questions to get you started, we suggest asking a broker, so there's no surprises when you make your final decision!

Next Step: Research
